E7.4-10260

CR-136590

Investigation Title: Utilization of Skylab (EREP) System for  
Appraising Changes in Continental Migra-  
tory Bird Habitat.

EREP Investigation No. 486

Period Covered: January 1974

NASA Contract No. T-4114B

Principal Investigations Management Office:

Lyndon B. Johnson Space Center  
Houston, Texas 77058

Technical Monitor Name: Mr. Roger Hicks

Principal Investigator and sponsoring institution name:

Mr. Harvey K. Nelson, Director  
Northern Prairie Wildlife Research Center  
Bureau of Sport Fisheries and Wildlife  
Jamestown, North Dakota 58401

Type of Report: Monthly Progress

Overall Status:

There is no significant change in the status of this program since the previous month's report. No S-192 computer compatible tapes (CCT's) have been received to date. Some additional photographic products from SL-2 and SL-3 have been received. In addition, a short interval of S-192 screening film covering a small portion of Site 866428 during SL-3 has been received. The usefulness of this site coverage is being evaluated. However, it is to be noted that 866428 is not a prime site.

The development of a software program for generating statistics on surface water features (referred to in our previous monthly report) is complete. It is still to be tested and documented.

Recommendations for Action:

There are no recommendations beyond those made in previous reports.

E74-10260) UTILIZATION OF SKYLAB (EREP)  
SYSTEM FOR APPRAISING CHANGES IN  
CONTINENTAL MIGRATORY BIRD HABITAT  
Monthly (Bureau of Sport Fisheries and  
Wildlife) 2 p HC \$3.00

00260

Expected Accomplishments During the Next Period:

We will continue to await the receipt of photographic data, S-192 screening film and CCT's.

Significant Results:

None to report.

Summary Outlook:

The remaining processing and analysis to be performed constitutes the major effort of the program.

Travel Summary and Outlook:

No travel has been undertaken or is anticipated for the forthcoming period.
